

Defend Council Housing

TENANTS DIE WHEN LANDLORDS DON'T LISTEN

We demand answers and justice for all who died, and all who are suffering hurt and loss in the terrible Grenfell fire. Every household affected has a right to a secure council home in the borough of Kensington. Take over empty blocks and homes if needed.

Tenants across Britain are horrified and fearful. **At Grenfell the residents' concerns and warnings were ignored for years. Many other landlords ignore tenants as well. >>>**

Justice for Grenfell – We all need answers!

>>> We all need to demand full fire safety specifications for your block or home, and an independent review (see below). Concerns must be addressed immediately.

The Grenfell tragedy must not be used to promote social cleansing.

The last Prime Minister, David Cameron, talked about demolishing 100 more estates, and minister Eric Pickles outrageously

described council homes as 'brownfield sites'. We will not tolerate Government, or the Mayor of London, pushing for demolition of tower blocks. Most need money spending on management, repairs and improvements including fire safety.

Government wants to get rid of council homes, and build expensive homes for sale or up to 80 per cent market rents. This prices people out and breaks up

communities. Promises of a 'right to return' are bogus – very few get to come back.

The Grenfell fire must not be used to justify demolition and estate clearance. Instead Government must drop the bogus debt-sucking funding out of council housing.

Invest now in existing and new council homes, with secure tenancies and council rents.

Landlords must listen!

DEMAND ACTION ON FIRE SAFETY

● Government must pay for removal of all combustibile cladding now

● A full public fire safety review, including all specifications of works already done

● Suspend redevelopment works until we re-

scrutinise plans and materials

● Re-instate independent fire safety inspection, with reports publicly available and enforced

● Full government funding for all fire safety recommendations

● Reverse the privatisation of health and safety, building control and materials research

● We demand landlords are made to listen – enforce a residents' right to vote on any redevelopment plans.
